

## **Evektor-Aerotechnik Launches Corporate-Wide Restructuring Program**

### *Move will Dramatically Enhance Development Efficiencies*

*Kunovice, Czech Republic, July 16, 2015* —Evektor-Aerotechnik, a subsidiary of EVEKTOR, spol. s r.o., has announced that it has launched a restructuring program in an effort to consolidate development and manufacturing efficiencies. The program will enable Evektor-Aerotechnik to improve business and manufacturing processes to assure consistent growth and market competitiveness. The restructuring program follows six months of robust sales of its Ultralight and Light Sport Aircraft (“UL/LSA”) – its best results in the last five years with doubling of orders compared to 2014.

The company’s restructuring program will allow it to continue its global success delivering the highest quality aircraft. Future plans include further product development and new innovations. Evektor-Aerotechnik’s parent company EVEKTOR, the leading design, engineering and manufacturing company for aircraft, automotive and power equipment, continues with EASA certification of the highly anticipated twin-engine, nine-passenger EV-55 Outback.

### **About Evektor-Aerotechnik**

Evektor-Aerotechnik is an EASA certified aircraft manufacturer with 45 years’ production experience and an established global sales network of authorized sales representatives in 50 countries worldwide.

The company’s primary business is involved in the production of advanced UL and LSA aircraft. With a fleet of 1,400+ delivered aircraft, Evektor-Aerotechnik is considered a top global manufacturer of airplanes for pilot training, air clubs and leisure flying.
